# Endorsement of International Consensus Radiochemistry Nomenclature Guidelines

Philip Elsinga<sup>1\*</sup>, Angelika Bischof Delaloye<sup>2</sup>, Arturo Chiti<sup>3,4</sup>, Stefaan Vandenberghe<sup>5</sup>, Francesco Giammarile<sup>6</sup> and Ignasi Carrio<sup>7</sup>

With the open letter published in *EJNMMI Radiopharmacy and Chemistry* by an international working group of experts, the EJNMMI journal family endorses the application of the guidelines in contributions to the journals.

Attached to the letter by the working group is a three-page summary highlighting the most relevant issues used in the notation of radiopharmaceuticals and related terms.

The full paper with all recommendations is published in “Consensus nomenclature rules for radiopharmaceutical chemistry—setting the record straight, Coenen, H.H., Gee A.D. et al., *Nuclear Medicine and Biology*, volume 55, v–xi (2017) (<https://doi.org/10.1016/j.nucmedbio.2017.09.004>)”.

All Editors-in-Chiefs of the EJNMMI journals strongly recommend all manuscripts meet these guidelines upon submission. In addition, all reviewers will be asked to be aware of the guidelines and wherever possible to check if the guidelines are followed.

Editors-in-Chief,

Philip Elsinga

Angelika Bischof Delaloye

Arturo Chiti

Stefaan Vandenberghe

Francesco Giammarile

Ignasi Carrio

## Authors' contributions

All authors read and approved the final manuscript.

## Competing interests

The authors declare that they have no competing interests.
